FAQ

How can I pay?

Our payment methods are preferably Bitcoin and USDT ERC20 & TRC20 , USDC ERC20 , ETH.

How do you ship? from where?

We declare your package as health supplements/medications/healthcare products as per current situation with customs , declarations are subject to anytime by shipper .

We use India post service to dispatch the packages or other postal services as well as per situation .

My products arrived less than what I ordered or different brand

If any item is missing in your package that you ordered please contact us we will check on our end if its our fault we will send out the item quickly or add it in your next order if you agree with it. Sometimes our pharmacy gets out of stock of your ordered item as we supply medications domestic India too so we replace the product with other same valued brand or better/costly brand but we never put an undervalue product or inferior quality product as replacement .

My tracking hasn't updated in a while. Why is that? Is it seized?

Sometimes the post just takes a bit - we've seen packages not update for up to two weeks and then suddenly move. The mysteries of logistics is beyond us, and put simply, these are magical at times. We try our best to retrace packages and get updates, but ultimately, even the logistics people themselves have no idea where your package is.

What are your reshipment policies?

We **DO NOT** offer any refunds - all purchases are **final**.

We will reship all international pharmacy orders upon proof of seizure letter or if your order is stuck in customs/lost in transit and it has been more than 20 days since the last update.

In some cases we will also offer store credit, as some items that are seized will be best ordered at a later time instead of immediately. Store credit will remain valid only for international orders.

If it so happens that your order is seized a second time - we're very sorry, but refunds are not offered. Best we can do is offer you the products at BASE COST to try again. This also applies to the countries that are except from our reshipment policy - we are always happy to try our best and help you by giving you the absolute base cost to get your products.

NOTE : WE ARE ONLY SHIPPING TO USA , UK , NEW ZEALAND , AUSTRALIA ETC, CURRENTLY , WE ARE NOT SHIPPING TO EUROPEAN COUNTRIES

T/A from shipment?

Please give us 2-3 business days to have your order packaged and shipped out.

From there, **Internationally**, it takes anywhere from 2-3 weeks usually worldwide to receive your medications. The t/a time greatly fluctuates with world events, and as such, is always unpredictable. We ask you to give us at least 4 weeks before lodging any complaints.

Minimum order quantity ?

We don't have minimum order quantity , you can order any amount of medication as per your comfort even just one blister/strip/ampoule

Do I have to sign?

It's okay to sign. The local courier just needs your signature since he thinks the area or package might be stolen. Use logic. If you believe your address has been flagged before, don't sign. If you are a high profile illegal entity, don't sign.

Do I place my real name on the address?

Please do. Aliases work, but sometimes your mailman will know who you are and if he sees a weird fucking name on a package, it might delay your package, even asking you to come pick it up. And that's on you.
